Listing of Claims

The following listing of claims will replace all prior versions, and listings, of claims in the application.

1.   (Currently amended) A method performed by a computer system, comprising:

storing an electronic version of a paper, the electronic version being displayable on a display device as a likeness of the paper, ~~wherein the paper is at least one of the following: a newspaper; a magazine; and a journal~~;

at a first location within the electronic version, detecting a reference to a second location, wherein the detected reference is at least one of the following, other than a computer network address: an alphanumeric character; a symbol; a term; and a phrase; and

in response to the detected reference, embedding a hyperlink within the detected reference ~~first location~~, wherein the hyperlink is selectable by a user to cause an operation associated with the second location.

2.   (Previously presented) The method of Claim 1 and comprising:

on the display device, displaying a first selector associated with a first portion of the paper;

on the display device, displaying a second selector associated with a second portion of the paper; and

on the display device, displaying a likeness of the first portion in response to a selection of the first selector.

3.   (Withdrawn).

4.   (Withdrawn).

5.   (Previously presented) The method of Claim 1 and comprising:

on the display device, in response to a user command, performing a pan function on the likeness of the paper.

6.   (Previously presented) The method of Claim 1 and comprising:

on the display device, in response to a user command, performing a zoom function on the likeness of the paper.

7.   (Previously presented) The method of Claim 1 and comprising:

in response to a selection of a portion of the electronic version, displaying the portion on the display device as a likeness of the paper in an enlarged format.

8.   (Currently amended) The method of Claim 1, wherein the detected reference ~~first location~~ is highlighted to indicate the hyperlink   .

9.   (Currently amended) A system, comprising:

a computing device for:

storing an electronic version of a paper, the electronic version being displayable on a
        display device as a likeness of the paper, ~~wherein the paper is at least one of the~~
        ~~following: a newspaper; a magazine; and a journal~~;

at a first location within the electronic version, detecting a reference to a second location,
        wherein the detected reference is at least one of the following, other than a
        computer network address: an alphanumeric character; a symbol; a term; and a
        phrase; and

in response to the detected reference, embedding a hyperlink within the detected
        reference ~~first location~~, wherein the hyperlink is selectable by a user to cause an
        operation associated with the second location.

10.   (Previously presented) The system of Claim 9 wherein the computing device is for:

on the display device, displaying a first selector associated with a first portion of the paper;

on the display device, displaying a second selector associated with a second portion of the paper; and

on the display device, displaying a likeness of the first portion in response to a selection of the first selector.

11.   (Withdrawn).

12.   (Withdrawn).

13.   (Previously presented) The system of Claim 9 wherein the computing device is for:

on the display device, in response to a user command, performing a pan function on the likeness of the paper.

14.   (Previously presented) The system of Claim 9 wherein the computing device is for:

on the display device, in response to a user command, performing a zoom function on the likeness of the paper.

15.   (Previously presented) The system of Claim 9 wherein the computing device is for:

in response to a selection of a portion of the electronic version, displaying the portion on the display device as a likeness of the paper in an enlarged format.

16.   (Currently amended) The system of Claim 9, wherein the detected reference first location is highlighted to indicate the hyperlink   .

17.   (Currently amended) A computer program product, comprising:

a computer program processable by a computer system for causing the computer system

to:

> store an electronic version of a paper, the electronic version being displayable on
>> a display device as a likeness of the paper, ~~wherein the paper is at least~~
>> ~~one of the following: a newspaper; a magazine; and a journal~~;
>
> at a first location within the electronic version, detect a reference to a second
>> location, wherein the detected reference is at least one of the following,
>> other than a computer network address: an alphanumeric character; a
>> symbol; a term; and a phrase; and
>
> in response to the detected reference, embed a hyperlink within the <u>detected</u>
>> <u>reference</u> ~~first location~~, wherein the hyperlink is selectable by a user to
>> cause an operation associated with the second location; and

apparatus from which the computer program is accessible by the computer system.

18.   (Previously presented) The computer program product of Claim 17 wherein the

computer program is processable by the computer system for causing the computer system to:

> on the display device, display a first selector associated with a first portion of the paper;
>
> on the display device, display a second selector associated with a second portion of the

paper; and

> on the display device, display a likeness of the first portion in response to a selection of

the first selector.

19.   (Withdrawn).

20.   (Withdrawn).

21.   (Previously presented) The computer program product of Claim 17 wherein the

computer program is processable by the computer system for causing the computer system to:

> on the display device, in response to a user command, perform a pan function on the

likeness of the paper.

22.   (Previously presented) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:

on the display device, in response to a user command, perform a zoom function on the likeness of the paper.

23.   (Previously presented) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:

in response to a selection of a portion of the electronic version, display the portion on the display device as a likeness of the paper in an enlarged format.

24.   (Currently amended) The computer program product of Claim 17, wherein the detected reference ~~first location~~ is highlighted to indicate the hyperlink.

25.   (Previously presented) The method of Claim 1, wherein the second location is located within the electronic version.

26.   (Previously presented) The method of Claim 25, wherein the detected reference includes a page number of the second location.

27.   (Previously presented) The method of Claim 1, wherein the operation includes displaying the second location on the display device.

28.   (Currently amended) The method of Claim 1, ~~wherein the electronic version is a second electronic version of the paper, and comprising~~:

translating a first ~~electronic~~ version of the paper into the ~~second~~ electronic version.

29.   (Previously presented) The method of Claim 1, and comprising:

forming a link table in the electronic version; and

in the link table, storing information associated with the hyperlink.

30.   (Currently amended) The method of Claim 8, wherein the detected reference first location is highlighted by an indicator to indicate the hyperlink, and comprising:

in response to a user command, selecting a type of the indicator.

31.   (Previously presented) The system of Claim 9, wherein the second location is located within the electronic version.

32.   (Previously presented) The system of Claim 31, wherein the detected reference includes a page number of the second location.

33.   (Previously presented) The system of Claim 9, wherein the operation includes displaying the second location on the display device.

34.   (Previously presented) The system of Claim 9, wherein the electronic version is a second electronic version of the paper, and wherein the computing device is for translating a first electronic version of the paper into the second electronic version.

35.   (Previously presented) The system of Claim 9, wherein the computing device is for:

forming a link table in the electronic version; and

in the link table, storing information associated with the hyperlink.

36.   (Currently amended) The system of Claim 16, wherein the detected reference first location is highlighted by an indicator to indicate the hyperlink, and wherein the computing device is for:

in response to a user command, selecting a type of the indicator.

37.   (Previously presented) The computer program product of Claim 17, wherein the second location is located within the electronic version.

38.   (Previously presented) The computer program product of Claim 37, wherein the detected reference includes a page number of the second location.

39.   (Previously presented) The computer program product of Claim 17, wherein the operation includes displaying the second location on the display device.

40.   (Previously presented) The computer program product of Claim 17, wherein the electronic version is a second electronic version of the paper, and wherein the computer program is processable by the computer system for causing the computer system to:

translate a first electronic version of the paper into the second electronic version.

41.   (Previously presented) The computer program product of Claim 17, wherein the computer program is processable by the computer system for causing the computer system to:

form a link table in the electronic version; and

in the link table, store information associated with the hyperlink.

42.   (Currently amended) The computer program product of Claim 24, wherein the detected reference ~~first location~~ is highlighted by an indicator to indicate the hyperlink, and wherein the computer program is processable by the computer system for causing the computer system to:

in response to a user command, select a type of the indicator.

43.   (Currently amended) A method performed by a computer system, comprising:

storing an electronic version of a paper, the electronic version being displayable on a display device as a likeness of the paper, wherein the paper is at least one of the following: a newspaper; a magazine; and a journal;

at a first location within the electronic version, detecting a reference to a second location within the electronic version, wherein the detected reference includes a page number of the second location; and

in response to the detected reference, embedding a hyperlink within the detected reference first location, wherein the hyperlink is selectable by a user to cause displaying of the second location on the display device.

44.   (Currently amended) A system, comprising:

a computing device for:

storing an electronic version of a paper, the electronic version being displayable on a display device as a likeness of the paper, wherein the paper is at least one of the following: a newspaper; a magazine; and a journal;

at a first location within the electronic version, detecting a reference to a second location within the electronic version, wherein the detected reference includes a page number of the second location; and

in response to the detected reference, embedding a hyperlink within the detected reference first location, wherein the hyperlink is selectable by a user to cause displaying of the second location on the display device.

Page 9 of 15

45.   (Currently amended) A computer program product, comprising:

a computer program processable by a computer system for causing the computer system
to:

> store an electronic version of a paper, the electronic version being displayable on
>> a display device as a likeness of the paper, wherein the paper is at least
>> one of the following: a newspaper, a magazine; and a journal;
>
> at a first location within the electronic version, detect a reference to a second
>> location within the electronic version, wherein the detected reference
>> includes a page number of the second location; and
>
> in response to the detected reference, embed a hyperlink within the detected
>> reference first location, wherein the hyperlink is selectable by a user to
>> cause displaying of the second location on the display device; and

apparatus from which the computer program is accessible by the computer system.

46.   (New) The method of Claim 1 and comprising:

receiving a watch list term;

searching the version for the watch list term; and

displaying a result of the searching.

47.   (New) The method of Claim 46 and comprising:

in response to a selection of the result, displaying a likeness of a portion of the paper
associated with the selected result on the display device.

48.   (New) The system of Claim 9 wherein the computing device is for:

receiving a watch list term;

searching the version for the watch list term; and

displaying a result of the searching.

49.   (New) The system of Claim 48 wherein the computing device is for:

> in response to a selection of the result, displaying a likeness of a portion of the

paper associated with the selected result on the display device.

50.   (New) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:

receive a watch list term;

search the version for the watch list term; and

display a result of the searching.

51.   (New) The computer program product of Claim 50 wherein the computer program is processable by the computer system for causing the computer system to:

in response to a selection of the result, display a likeness of a portion of the paper associated with the selected result on the display device.
